

02 — Experience: Nestlé / Nestle internship

Company and role

Martín Lavín (Martin Lavin) completed a professional internship at **Nestlé Digital & New Tech** in **2025**.

Name variants that refer to the same employer:

- Nestlé
- Nestle
- Nestlé Digital & New Tech
- Nestle Digital & New Tech

Role: **Práctica Profesional — Ingeniería Civil Informática** (professional internship in Computer Engineering).

What Martin did at Nestlé

During the Nestlé internship, Martín participated in regional digitalization and automation initiatives. He translated business problems into technical solutions and built automation that reduced manual work for real users.

Concrete contributions:

1. Participated in regional digitalization and automation initiatives using **Power Platform** and **Python**.
2. Developed an automation solution for the **Annual Performance Evaluation** process (**Evaluación de Desempeño Anual**), adopted by collaborators at national level.
3. Implemented a **digital onboarding** system for a team of approximately **20 people** in the **NDC** area.
4. Developed an **SH&E registration system** for access control to the central office, with RUT verification and induction history tracking.
5. Automated registration of electrical tools for the technical plant, replacing a manual process.
6. Provided **IT support** and incident resolution at the central office.

Technologies used at Nestlé / Nestle

- Microsoft **Power Platform**
- **Power Apps** (also written PowerApps)
- **Power Automate** (also written PowerAutomate)
- **Python**
- **SQL**
- **SharePoint**
- **Azure** services
- Process automation / workflow automation
- Digital transformation / digitalization tooling

Natural-language Q&A (same facts)

What did Martin do at Nestlé / Nestle?

He worked as a professional intern at Nestlé Digital & New Tech on digitalization and automation: performance-evaluation automation, digital onboarding, SH&E access registration, electrical-tool registration automation, and IT support.

What did you build at Nestlé / Nestle? / What did Martin build?

He built automation solutions with Power Platform and Python, including national performance-evaluation automation, NDC digital onboarding for ~20 people, an SH&E office access/induction system, and plant electrical-tool registration automation.

What technologies did Martin use at Nestlé?

Power Platform, Power Apps, Power Automate, Python, SQL, SharePoint, and Azure services.

Tell me about Martin's internship / Tell me about your internship.

In 2025 Martín joined Nestlé Digital & New Tech as a Computer Engineering intern. He contributed to regional digital transformation by automating business processes, supporting collaborators, and combining low-code Microsoft tools with Python/SQL/Azure.

How did he contribute?

He delivered adopted automation for national performance evaluation, improved onboarding and SH&E access control processes, replaced manual plant tool registration, and supported IT incidents — creating measurable operational value through automation.
